# Table of Contents: Volume 247 1987

No. 1 1–232 issued on 15.12.1986
No. 2 233–468 issued on 16.01.1987
No. 3 469–296 issued on 16.02.1987

Adler G, see Rausch U, et al. 187–193
Akisaka T, Subita GP, Shigenaga Y: Ultrastructural observations on chick bone processed by quick-freezing and freeze-substitution 469–475
Ameismeier F: Ultrastructure of the chemosensitive basiconic single-walled wall-pore sensilla on the antennae in adults and embryonic stages of *Locusta migratoria* L. (Insecta, Orthoptera) 605–612
Avanzini F, Bignetti E, Bordi C, Carfagna G, Cavaggioni A, Ferrari G, Sorbi RT, Tirindelli R: Immunocytochemical localization of pyrazine-binding protein in bovine nasal mucosa 461–464
Baertschi AJ, see Theler J-M, et al. 639–649
Bailly Y, see Dunel-Erb S 339–350
Banse C, see Rodríguez S, et al. 359–366
Baud CA, see Boivin G, et al. 525–532
Beckers JF, see Wooding FBP 667–673
Beier K, Fahimi HD: Application of automatic image analysis for morphometric studies of peroxisomes stained cytochemically for catalase. II. Light-microscopic application 179–185
Belbeck L, see Daniel EE, et al. 377–384
Bellin SI, see Dellmann H-D, et al. 137–143
Bergeron M, Gaffiero P, Thiéry G: Segmental variations in the organization of the endoplasmic reticulum of the rat nephron. A stereomicroscopic study 215–225
Bern HA, see Larson BA, et al. 233–239
Bicker G, see Rehder V, et al. 59–66
Bignetti E, see Avanzini F, et al. 461–464
Björkman U, see Ring P, et al. 505–513
Bodin P, Stoclet J-C, Travo P: Differences in myocyte subpopulations from segments of the thoracic aorta and their modifications with age and hypertension in the rat 227–231
Boivin G, Walzer C, Baud CA: Ultrastructural study of the long-term development of two experimental cutaneous calcinoses (topical calciphylaxis and topical calcergy) in the rat 525–532
Bordi C, see Avanzini F, et al. 461–464
Boucique E, see Olivereau M, et al. 317–324
Brodin E, see Ju G, et al. 417–431
Brown JC, see Ju G, et al. 417–431
Bunnage HJ, see Smith CA, et al. 433–440
Calas A, see Rabhi M, et al. 33–40
Calverley RKS, Jones DG: A serial-section study of perforated synapses in rat neocortex 565–572
Carfagna G, see Avanzini F, et al. 461–464
Castellucci VF, see Theler J-M, et al. 639–649
Cavaggioni A, see Avanzini F, et al. 461–464
Chen K, see Stumpf WE, et al. 453–455
Chikazawa H, see Watanabe T, et al. 25–32
Chohan KS, see Muske LE, et al. 299–307
Chungsamarnyart N, see Watanabe T, et al. 25–32
Coleman DL, see Widdicombe JH, et al. 95–103
Conrad DC, see Kirby ML, et al. 489–496
Consi ThR, Macagno ER, Necles N: The oculomotor system of *Daphnia magna*. The eye muscles and their motor neurons 515–523
Cook H, Peute J, Goos HJTh, Sokolowska M, Oordt van PGWJ, Peter RE: Gonadotropin production and release in female goldfish (*Carassius auratus*) after administration of pimozide and an LHRH analogue as studied by electron microscopy and radioimmunoassay 477–482
Costa M, see Daniel EE, et al. 377–384
Costa M, see Wilson AJ, et al. 497–504
Csillik B, see Knyihár-Csillik E, et al. 599–604
Daniel EE, Furness JB, Costa M, Belbeck L: The projections of chemically identified nerve fibres in canine ileum 377–384
Delannoy L, see Peruzzo B, et al. 367–376
Dellmann H-D, Lue L-F, Bellin SI: Fine structural characteristics of neurophysin-positive perivascular plexus that develop in the rat hypothalamus following interruption of the hypothalamo-neurohypophysial tract 137–143
DeLuca HF, see Stumpf WE, et al. 453–455
DiDo LJA, see Hamlett WC, et al. 275–285
Dockray GJ, see Muske LE, et al. 299–307
Drewes LR, see Gerhart DZ 533–536
Duchaine J, see Vincent M 625–631
Dunel-Erb S, Bailly Y: Smooth muscles in relation to the gill skeleton of *Perca fluviatilis*: organization and innervation 339–350
Durand N, see Girod Ch, et al. 11–16
Edwards H, see Treherne JE, et al. 121–128
Ekholm R, see Ring P, et al. 505–513
Elde RP, see Ju G, et al. 417–431
Elliott WM, Youson JH: Immunohistochemical observations of the endocrine pancreas during metamorphosis of the sea lamprey, *Petromyzon marinus* L. 351–357
Emanuelsson H, see Löwkvist B, et al. 75–84
Fahimi HD, see Beier K 179–185
Fahrenkrug J, see Ju G, et al. 417–431
Ferrari G, see Avanzini F, et al. 461–464
Fiedler W, see Richardson GP, et al. 651–665
Finkbeiner WE, see Widdicombe JH, et al. 95–103
Fischer JA, see Ju G, et al. 417–431
Fishkind DJ, see Neutra MR, et al. 537–546
Fleischmajer R, Perlish JS, Olsen BR: Amino and carboxyl propeptides in bone collagen fibrils during embryogenesis 105–109
Fletcher JM, see Pickering AD 259–265
Flickinger CJ, see Samuel LH 203–213
Foelix RF, Kretz R, Rager G: Structure and postnatal development of photoreceptors and their synapses in the retina of the tree shrew (*Tupaia belangeri*) 287–297
Fox GQ, see Richardson GP, et al. 651–665
Frey P, see Ju G, et al. 417–431
Friend DS, see Widdicombe JH, et al. 95–103
Fujioka T, see Watanabe T, et al. 25–32
Fujita T, see Kuramoto H, et al. 309–315
Fukuda T, Hashimoto PH: Distribution and fine structure of ependymal cells possessing intracellular cysts in the aqueductal wall of the rat brain 555–564
Furness JB, see Daniel EE, et al. 377–384
Furness JB, see Wilson AJ, et al. 497–504
Gaffiero P, see Bergeron M, et al. 215–225
Geffard M, see Rabhi M, et al. 33–40
George JC, see Rosser BWC 689–696
Gerhart DZ, Drewes LR: Butyrylcholinesterase in pericytes associated with canine brain capillaries 533–536
Gillespie JI, McHanwell S: Measurement of intra-embryonic pH during the early stages of development in the chick embryo 445–451
Girod Ch, Durand N, Raccurt M: Immunostaining of a cell type in the islets of Langerhans of the monkey *Macaca irus* by antibodies against S-100 protein 11–16

Gnatzy W, see Heusslein R 591–598
Goos HJTh, see Cook H, et al. 477–482
Haley SR, see Smith CJ 675–687
Hamlett WC, Schwartz FJ, DiDo LJA: Subcellular organization of the yolk syncytial-endoderm complex in the preimplantation yolk sac of the shark, *Rhizoprionodon terraenovae* 275–285
Hammer M, see Rehder V, et al. 59–66
Hansson H-A, Rozell B, Skottner A: Rapid axoplasmic transport of insulin-like growth factor I in the sciatic nerve of adult rats 241–247
Harris AJ, see McCaig CD, et al. 41–50
Hasegawa K, see Iijima T, et al. 167–177
Hashimoto PH, see Fukuda T 555–564
Haskell BE, Stach RW, Werrbach-Perez K, Perez-Polo JR: Effect of retinoic acid on nerve growth factor receptors 67–73
Heby O, see Löwkvist B, et al. 75–84
Hein S, see Peruzzo B, et al. 367–376
Heusslein R, Gnatzy W: Central projections of campaniform sensilla on the cerci of crickets and cockroaches 591–598
Hisada M, see Kondoh Y 17–24
Hökfelt T, see Ju G, et al. 417–431
Howes EA, Smith PJS, Treherne JE: Glial repair in the cultured central nervous system of an insect (*Periplaneta americana*) 111–120
Howes EA, see Smith PJS 129–135
Hurk van den R, Resink JW, Peute J: The seminal vesicle of the African catfish, *Clarias gariepinus*. A histological, histochemical, enzyme-histochemical, ultrastructural and physiological study 573–582
Iijima T, Kondo T, Hasegawa K: Autonomic innervation of the arteriovenous anastomoses in the dog tongue. A histochemical and ultrastructural study 167–177
Janetzko A, Zimmermann H, Volknandt W: The electromotor system of the electric catfish (*Malapterurus electricus*): A fine-structural analysis 613–624
Jones DG, see Calverley RKS 565–572
Józsa R, Korf H-W, Merchenthaler I: Growth hormone-releasing factor (GRF)-like immunoreactivity in sensory ganglia of the rat 441–444
Ju G, Hökfelt T, Brodin E, Fahrenkrug J, Fischer JA, Frey P, Elde RP, Brown JC: Primary sensory neurons of the rat showing calcitonin gene-related peptide immunoreactivity and their relation to substance P-, somatostatin-, galanin-, vasoactive intestinal polypeptide- and cholecystokinin-immunoreactive ganglion cells 417–431
Kah O, see Rabhi M, et al. 33–40
Kern HF, see Rausch U, et al. 187–193
Kern HF, see Lütcke H, et al. 385–391
Kirby ML, Conrad DC, Stewart DE: Increase in the cholinergic cardiac plexus in sympathetically aneural chick hearts 489–496
Knyihár-Csillik E, Rakic P, Csillik B: Transganglionic degenerative atrophy in the substantia gelatinosa of the spinal cord after peripheral nerve transection in rhesus monkeys 599–604
Kondo H, see Kuramoto H, et al. 309–315
Kondo T, see Iijima T, et al. 167–177
Kondoh Y, Hisada M: The topological organization of primary afferents in the terminal ganglion of crayfish, *Procambarus clarkii* 17–24
Koop I, see Rausch U, et al. 187–193
Korf H-W, see Møller M 145–153
Korf H-W, see Józsa R, et al. 441–444
Kretz R, see Foelix RF, et al. 287–297
Kühnel W, see Mendoza AS 457–459
Kuramoto H, Kondo H, Fujita T: Calcitonin gene-related peptide (CGRP)-like immunoreactivity in scattered chromaffin cells and nerve fibers in the adrenal gland of rats 309–315
Larson BA, Bern HA, Lin RJ, Nishioka RS: A double sequential immunofluorescence method demonstrating the co-localization of urotensins I and II in the caudal neurosecretory system of the teleost, *Gillichthys mirabilis* 233–239
Lederis K, see Yulis CR 267–273
Lee JK, Repasky EA: Cytoskeletal polarity in mammalian lymphocytes in situ 195–202
Lin RJ, see Larson BA, et al. 233–239
Llewellyn-Smith IJ, see Wilson AJ, et al. 497–504
Löwkvist B, Emanuelsson H, Persson L, Sundler F, Lundquist A, Heby O: Localization of ornithine decarboxylase in the chick embryo during organogenesis 75–84
Lue L-F, see Dellmann H-D, et al. 137–143
Lundquist A, see Löwkvist B, et al. 75–84
Lütcke H, Scheele GA, Kern HF: Time course and cellular site of mitotic activity in the exocrine pancreas of the rat during sustained hormone stimulation 385–391
Macagno ER, see Consi ThR, et al. 515–523
Mayer EL, see Neutra MR, et al. 537–546
McCaig CD, Ross JJ, Harris AJ: Embryonic somatic nerve destruction with β-bungarotoxin 41–50
McHanwell S, see Gillespie JI 445–451
Meller K: The cytoskeleton of cryofixed Purkinje cells of the chicken cerebellum 155–165
Mendoza AS, Kühnel W: Morphological evidence for a direct innervation of the mouse vomeronasal glands 457–459
Merchenthaler I, see Józsa R, et al. 441–444
Miyauchi J, Watanabe Y: Immunocytochemical localization of lactoferrin in human neutrophils:. An ultrastructural and morphometrical study 249–258
Mizuhira V, see Yamaoka I 633–637
Møller M, Korf H-W: Neural connections between the brain and the pineal gland of the golden hamster (*Mesocricetus auratus*). Tracer studies by use of horseradish peroxidase in vivo and in vitro 145–153
Monaghan P, see Smith CA, et al. 433–440
Morin J, see Stumpf WE, et al. 453–455
Muske LE, Dockray GJ, Chohan KS, Stell WK: Segregation of FMRF amide-immunoreactive efferent fibers from NPY-immunoreactive amacrine cells in goldfish retina 299–307
Necles N, see Consi ThR, et al. 515–523
Neutra MR, Phillips TL, Mayer EL, Fishkind DJ: Transport of membrane-bound macromolecules by M-cells in follicle-associated epithelium of rabbit Peyer's patch 537–546
Neutra MR, see Phillips ThE, et al. 547–554
Neville AM, see Smith CA, et al. 433–440
Nishioka RS, see Larson BA, et al. 233–239
Obinata T, see Terakado K 85–94
Oksche A, see Rodríguez S, et al. 359–366
Oksche A, see Peruzzo B, et al. 367–376
Olivereau JM, see Olivereau M, et al. 317–324
Olivereau M, Vandesande F, Boucique E, Ollevier F, Olivereau JM: Immunocytochemical localization and spatial relation to the adenohypophysis of a somatostatin-like and a corticotropin-releasing factor-like peptide in the brain of four amphibian species 317–324
Ollevier F, see Olivereau M, et al. 317–324
Olsen BR, see Fleischmajer R, et al. 105–109
Onteniente B, see Rabhi M, et al. 33–40
Oordt van PGWJ, see Cook H, et al. 477–482
Perez-Polo JR, see Haskell BE, et al. 67–73
Perlish JS, see Fleischmajer R, et al. 105–109
Perret C, see Warembourg M, et al. 51–57
Persson L, see Löwkvist B, et al. 75–84
Persson M, Vey A, Söderhäll K: Encapsulation of foreign particles in vitro by separated blood cells from crayfish, *Astacus leptodactylus* 409–415
Peruzzo B, Rodríguez S, Delannoy L, Hein S, Rodríguez EM, Oksche A: Ultrastructural immunocytochemical study of the massa caudalis of the subcommissural organ-Reissner's fiber

complex in lamprey larvae (*Geotria australis*): Evidence for a terminal vascular route of secretory material 367–376
Peter RE, see Cook H, et al. 477–482
Peute J, see Cook H, et al. 477–482
Peute J, see Hurk van den R, et al. 573–582
Phillips ThE, Phillips TL, Neutra MR: Macromolecules can pass through occluding junctions of rat ileal epithelium during cholinergic stimulation 547–554
Phillips TL, see Neutra MR, et al. 537–546
Phillips TL, see Phillips ThE, et al. 547–554
Pickering AD, Fletcher JM: Sacciform cells in the epidermis of the brown trout, *Salmo trutta*, and the Arctic char, *Salvelinus alpinus* 259–265
Popp W, see Wachtler F, et al. 583–589
Rabhi M, Onteniente B, Kah O, Geffard M, Calas A: Immunocytochemical study of the GABAergic innervation of the mouse pituitary by use of antibodies against gamma-aminobutyric acid (GABA) 33–40
Raccurt M, see Girod Ch, et al. 11–16
Rager G, see Foelix RF, et al. 287–297
Rakic P, see Knyihár-Csillik E, et al. 599–604
Rausch U, Adler G, Weidenbach H, Weidenbach F, Rudolff D, Koop I, Kern HF: Stimulation of pancreatic secretory process in the rat by low-molecular weight proteinase inhibitor. I. Dose-response study on enzyme content and secretion, cholecystokinin release and pancreatic fine structure 187–193
Rehder V, Bicker G, Hammer M: Serotonin-immunoreactive neurons in the antennal lobes and suboesophageal ganglion of the honeybee 59–66
Repasky EA, see Lee JK 195–202
Resink JW, see Hurk van den R, et al. 573–582
Ribi WA: Anatomical identification of spectral receptor types in the retina and lamina of the Australian orchard butterfly, *Papilio aegeus aegeus* D. 393–407
Richardson GP, Fiedler W, Fox GQ: Development of the electromotor system of *Torpedo marmorata:* Distribution of extracellular matrix and cytoskeletal components during acetylcholine receptor focalization 651–665
Ring P, Björkman U, Ekholm R: Effect of cooling on intracellular transport and secretion of thyroglobulin 505–513
Rodríguez S, see Peruzzo B, et al. 367–376
Rodríguez EM, see Rodríguez S, et al. 359–366
Rodríguez EM, see Peruzzo B, et al. 367–376
Rodríguez PA, see Rodríguez S, et al. 359–366
Rodríguez S, Rodríguez PA, Banse C, Rodríguez EM, Oksche A: Reissner's fiber, massa caudalis and ampulla caudalis in the spinal cord of lamprey larvae (*Geotria australis*). Light-microscopic immunocytochemical and lectin-histochemical studies 359–366
Ross JJ, see McCaig CD, et al. 41–50
Rosser BWC, George JC: Ultrastructural and cytological changes in the muscle fibers of the pectoralis of the giant Canada goose (*Branta canadensis maxima*) in disuse atrophy during molt 689–696
Rozell B, see Hansson H-A, et al. 241–247
Rudolff D, see Rausch U, et al. 187–193
Samuel LH, Flickinger CJ: The relationship between the morphology of cell organelles and kinetics of the secretory process in male sex accessory glands of mice 203–213
Sanders EJ: Ultrastructural cytochemical localization of adenylate cyclase in the early chick embryo 465–468
Sar M, see Stumpf WE, et al. 453–455
Scheele GA, see Lütcke H, et al. 385–391
Schindler JF, Vries de U: Maternal-embryonic relationships in the goodeid teleost, *Xenoophorus captivus*. Embryonic structural adaptations to viviparity 325–338
Schwartz FJ, see Hamlett WC, et al. 275–285
Schwarzacher HG, see Wachtler F, et al. 583–589
Seyan HS, see Strausfeld NJ 5–10
Shigenaga Y, see Akisaka T, et al. 469–475
Skottner A, see Hansson H-A, et al. 241–247
Smith CA, Bunnage HJ, Monaghan P, Neville AM: Human breast epithelium in vitro: The re-expression of structural and functional cellular differentiation in long-term culture 433–440
Smith CJ, Haley SR: Evidence of steroidogenesis in postovulatory follicles of the tilapia, *Oreochromis mossambicus* 675–687
Smith PJS, Howes EA: Neural repair in an insect central nervous system (*Periplaneta americana*): cell kinetics and proliferation after selective glial disruption 129–135
Smith PJS, see Howes EA, et al. 111–120
Smith PJS, see Treherne JE, et al. 121–128
Söderhäll K, see Persson M, et al. 409–415
Sokolowska M, see Cook H, et al. 477–482
Sorbi RT, see Avanzini F, et al. 461–464
Stach RW, see Haskell BE, et al. 67–73
Stell WK, see Muske LE, et al. 299–307
Stewart DE, see Kirby ML, et al. 489–496
Stoclet J-C, see Bodin P, et al. 227–231
Strausfeld NJ, Seyan HS: Resolution of complex neuronal arrangements in the blowfly visual system using triple fluorescence staining 5–10
Stumpf WE, Sar M, Chen K, Morin J, DeLuca HF: Sertoli cells in the testis and epithelium of the ductuli efferentes are targets for $^3$H 1,25 $(OH)_2$ vitamin $D_3$. An autoradiographic study 453–455
Subita GP, see Akisaka T, et al. 469–475
Sundler F, see Löwkvist B, et al. 75–84
Terakado K, Obinata T: Structure of multinucleated smooth muscle cells of the ascidian *Halocynthia roretzi* 85–94
Theler J-M, Castellucci VF, Baertschi AJ: Ultrastructure of the osphradium of *Aplysia californica* 639–649
Thiéry G, see Bergeron M, et al. 215–225
Thomasset M, see Warembourg M, et al. 51–57
Tirindelli R, see Avanzini F, et al. 461–464
Travo P, see Bodin P, et al. 227–231
Treherne JE, Smith PJS, Edwards H: Neural repair in an insect (*Periplaneta americana*): cell recruitment and deployment following selective glial disruption 121–128
Treherne JE, see Howes EA, et al. 111–120
Usukura J, Yamada E: Ultrastructure of the synaptic ribbons in photoreceptor cells of *Rana catesbeiana* revealed by freeze-etching and freeze-substitution 483–488
Vandesande F, see Olivereau M, et al. 317–324
Vey A, see Persson M, et al. 409–415
Vincent M, Duchaine J: Histological characterization of a monoclonal antibody raised against the branchial arches of the chick embryo: reactivity with myogenic lineages and a few non-mesodermal derivatives 625–631
Volknandt W, see Janetzko A, et al. 613–624
Vries de U, see Schindler JF 325–338
Wachtler F, Popp W, Schwarzacher HG: Structural changes in nucleoli during inhibition of protein- and RNA-biosynthesis 583–589
Walzer C, see Boivin G, et al. 525–532
Warembourg M, Perret C, Thomasset M: Analysis and in situ detection of cholecalcin messenger RNA (9000 Mr CaBP) in the uterus of the pregnant rat 51–57
Watanabe T, Chikazawa H, Chungsamarnyart N, Fujioka T, Yamada J: Serotonin-storing cells of the chicken duodenum: light, fluorescence and electron microscopy, and immunohistochemistry 25–32
Watanabe Y, see Miyauchi J 249–258
Weidenbach F, see Rausch U, et al. 187–193
Weidenbach H, see Rausch U, et al. 187–193
Werrbach-Perez K, see Haskell BE, et al. 67–73
Widdicombe JH, Coleman DL, Finkbeiner WE, Friend DS: Primary cultures of the dog's tracheal epithelium: fine structure, fluid, and electrolyte transport 95–103

Wilson AJ, Llewellyn-Smith IJ, Furness JB, Costa M: The source of the nerve fibres forming the deep muscular and circular muscle plexuses in the small intestine of the guinea-pig 497–504
Wooding FBP, Beckers JF: Trinucleate cells and the ultrastructural localisation of bovine placental lactogen 667–673
Yamada E, see Usukura J 483–488
Yamada J, see Watanabe T, et al. 25–32
Yamaoka I, Mizuhira V: X-ray microanalysis of the mineral components in the scales of an amoeba, *Cochliopodium* sp. (Testacea) 633–637
Youson JH, see Elliott WM 351–357
Yulis CR, Lederis K: Co-localization of the immunoreactivities of corticotropin-releasing factor and arginine vasotocin in the brain and pituitary system of the teleost *Catostomus commersoni* 267–273
Zimmermann H, see Janetzko A, et al. 613–624
